

About the Speaker...
Zev Kaufman, D.D.S.

Dr. Kaufman has a New York City practice limited to Prosthodontics and Implant Surgery. After graduation with honors from New York University College of Dentistry, Dr. Kaufman completed a general dental practice residency program at St. Barnabas Hospital in the Bronx. He received his certificate in Prosthodontics from the Advanced Education Program in Prosthodontics at New York University, continued his studies at the Department of Implant Dentistry and received his certificate in Implant Surgery and Restoration.

Currently, Dr. Kaufman is a clinical assistant professor in the department of Implant Dentistry at New York University, and presents a weekly seminar to the second year residents on Implant Prosthodontics. He has published nationally and internationally, and presented in major meetings including the Greater New York Dental Meeting and the Annual Northeast Implant Symposium. Dr. Kaufman is a member of the Academy of Osseointegration, the American College of Prosthodontists, and the Omicron Kappa Upsilon Dental Honor Society.

Practical Approach to Implant Dentistry

Dr. Zev Kaufman will lecture on Practical Approach to Implant Dentistry on Friday, June 28, and conduct a hands-on workshop on Saturday, June 29, 2002 at the LaGuardia Marriott Hotel at the LaGuardia Airport in East Elmhurst, New York.

"What is an implant and how is it adaptable in the replacement of our patient's dentition?" This is the question that our patients ask us almost on a daily basis. We as professionals need to know how to discuss the process intelligently with them. The types of implants - cement versus screw retained, machined and custom abutments, advantages and disadvantages of each. What is the difference in treatment planning when using multiple or single tooth implants? Most importantly, the interdisciplinary approach to each individual case needs to be understood.

As implant dentistry is continuously evolving into a more predictable form of therapy, so do new and innovative techniques which now allow for better esthetics and greater patient comfort. This course will present the most up-to-date information available as it relates to the following topics:

- When is a cementable or screw-retained restoration preferable?
- Can we load implants immediately, or earlier?
- Should osseointegrated implants be splinted to natural teeth?
- How to attain ideal esthetic single tooth restorations.
- How do implants affect treatment planning for the advanced perio-prosthetic case?
- Treating the serial extraction case.
- Do we need attached gingiva for long-term implant survival?
- Is smoking a risk factor for implants?
- How to maintain dental implants for long term success.
- Optional advanced topics and hands-on workshop will concentrate on intra-oral, as well as the laboratory steps, stressing communication between dentists and technicians.

Join us to learn about these topics and many more!

Who Should Attend:

This program is designed for general practitioners seeking to integrate implant dentistry into their esthetic and restorative practices. General Dentists will benefit most from this program, as well as Oral Surgeons and Periodontists who are interested in understanding the steps following surgery. Hygienists and support staff are encouraged to attend. Dental Technicians are welcome, especially on Saturday for extensive hands-on and laboratory training.

Program Time:

Friday, June 28, 2002, registration and continental breakfast begin at 8:00 AM. Dr. Kaufman's program begins at 9:00 AM and will conclude at 4:00 PM.

Lunch is included with registration.

Saturday, June 29, 2002, registration and breakfast begin at 8:00 AM. The educational program will begin at 9:00 AM and end at 1:00 PM.

General Information:

The LaGuardia Marriott Hotel is located directly across from the LaGuardia Airport on Ditmars Blvd. Please see the enclosed brochure for driving directions. Please contact the hotel directly for room reservations.

Registration/Cancellation:

To provide each participant with a focused and personalized experience, the number of registrants is limited for this course and registration is accepted on a first-come, first-serve basis. Full tuition payment must accompany all registration forms. Upon receipt of registration form and tuition fee, you will be sent a confirmation.

Confirmed registrants unable to attend this course can obtain a refund (less \$50 administration fee) by notifying the Russian American Dental Association no later than June 14, 2002. Cancellations after that date will be subject to an additional penalty. The Russian American Dental Association reserves the right to cancel this program no later than 14 days prior to the course date.

CE Credits:

Each attendee will be awarded 10 CE credits for this program. Implant Innovations Inc. and RADA are ADA recognized providers. Continuing Education credits awarded for participation in the CE activity may not apply toward license renewal in all states. It is the responsibility of each participant to verify the requirements of his/her state licensing board.

Registration:

Please complete the registration form and return by mail no later than June 14th to:

**Russian American Dental Association
Annual Spring Meeting
FDR Station PO Box 338
New York, NY 10150
866-723-2337**

Payment of registration fees may only be by check. Please make checks out to the Russian American Dental Association.
